The system downloads all required Hours of Service (HOS) log history when the driver logs onto their device.

Viewing information does not require a cellular data connection because it is contained in the driver's device's database.

Additional data is gathered from the vehicle's Electronic Control Module (ECM) and/or the driver's entries as they occur. This information is added to the historical data and is stored in the driver's device's database.

A copy is also sent to the server's database via a cellular data network.

All data is retrievable by the driver at any time. It is also retrievable by anyone with proper access to the server.

ACCESSING THE ROADSIDE INSPECTION INFORMATION:

- 1. Select the menu icon
- 2. Select Roadside Inspection

Once the information is displayed, the driver can hand over the device to the Roadside Inspector who will see the following options:

- Daily Log is a record that accounts for all the driver's on-duty and off-duty time for that particular day
- Vehicle Inspection is a report that the driver fills out at the beginning and end of his trip to ensure the vehicle is in good condition
- Roadside Instructions is a document to help the inspector use the application
- Certification shows the application's vendor certification form.

If you have selected a Canadian rule, you will see these additional information:

- Cycle
 - Cycle 1 7 days' rest period
 Cycle 2 14 days' rest period
 - Cycle 2-14 days lest peri
 - Deferral Day o Refers to a shorter rest period on the current day for up to a maximum of 2 hours.
- Total Time Remaining in Cycle
 - Represents the total amount of time you have left to work in the current cycle.
- Total On-Duty Time in Cycle
 - Indicates the amount of time you have accumulated in the current cycle

VIEWING THE DAILY LOG

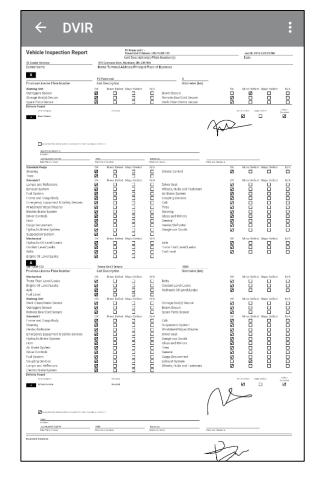

From the Roadside Inspection screen, tap on the **Daily** Log button will display the driver's current daily log.

From the **Daily Log screen**, you will have the following options:

- Choose the date of the daily log that you wish to see
- Export the daily log by email.

NOTE:

- This log is scalable and movable on-screen
- The inspector can select the driver's logs from any previous days as required (7 days plus current for US rules and 14 days plus current for Canadian rules)
- To return to the Roadside Inspection screen, tap on the left arrow or back
- It is not necessary to be in cellular coverage for either the Roadside inspection or return to the HOS application.

VIEWING THE DVIR

The inspector will see the current **Driver's Vehicle Inspection Report** (DVIR) and can zoom in or out to see more of the report.
