

Quick Reference Card

Working with the Driver Scorecard: Vision Mobile App (Android Only)

OVERVIEW

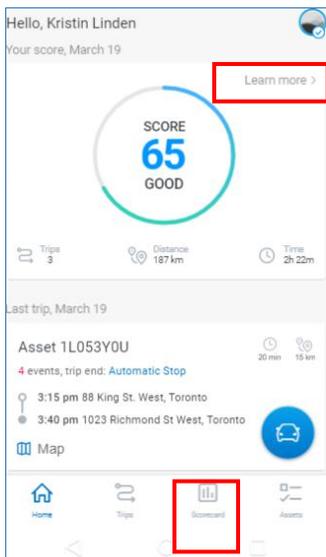

The improved Driver Scorecard for Android displays Driver behavior and performances. Based on all completed trips, the app now allocates a score range to Drivers along with an overall ranking in the fleet.

This helps a fleet manager better monitor and improve their Fleet's Driving behavior.

The app now also provides daily score updates each evening and will notify the user if their ranking has changed amongst the other drivers in their fleet based on their recent trips.

ACCESS THE DRIVER SCORECARD

The Vision Mobile App Home Screen displays the most recent Driver score and their performance Ranking.

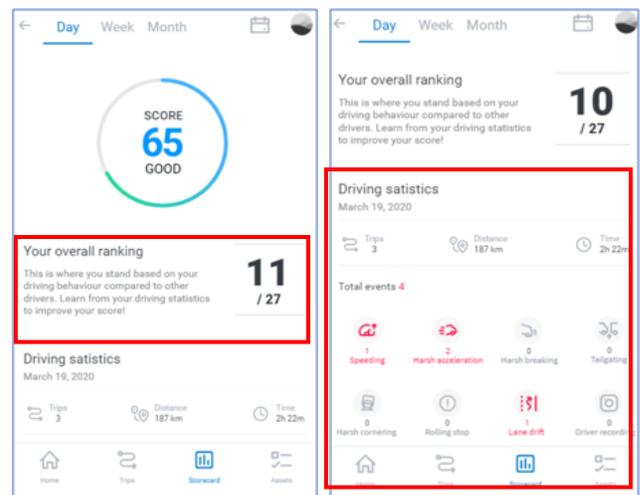

1. select the **Learn More** button to access the Driver Scorecard

2. Alternatively, tap the Scorecard menu option from the navigation panel on the home screen, to access the Scorecard screen

THE DRIVER SCORECARD

The Driver Scorecard displays Driver performance for the Day, by default. You can also view the Driver Statistics for the Week, Month, as necessary.

The Driver score is associated with a performance category and a color coding. For example: When the performance category is **Good**, the circle displays a blue color.

The Driver Scorecard screen also displays the **Overall Ranking** of the Driver compared to other Drivers in the Fleet. In the example above, the Driver ranks 11 compared to 27 Drivers in the Fleet.

1. Scroll through the screen to review the Driver Statistics

The **Driver Statistics** outline the total number of Trips, Distance and Time covered by the Driver, and all Triggered events. All triggered events are highlighted in **Red**.

DRIVER PERFORMANCE CATEGORIES & COLOR CODING

The following performance categories are assigned based on the following Score Range:

- **1-20: Very Poor**

Quick Reference Card

- **21-40: Poor**
- **41-60: Average**
- **61-80: Good**
- **80-100: Excellent**

Note: Driver score is always calculated based on number of events triggered with the distance traveled.

The following are the color coding for the Performance Categories above:
